UNIVERSITIES IN GERMANY

1. A full University offers study programs in basically all fields of study
2. Technical Universities are specialized in technical programs (e.g. engineering) but also offer other non-technical study programs
3. Art Schools specialize in art, music, architecture or theatre. Usually, they do not offer other study programs
4. Universities of Applied Sciences offer a wide range of programs. Their teaching approach is less scientific and more practical compared to universities.

CURRICULUM

- In Bachelor, Master and some State Examination programs, classes are offered as part of modules
 - modules bundle together classes sharing a thematic and/or methodological approach.
 - modules usually consist of two or three different classes.
 - module contents, kinds of examinations and learning goals are codified.

Exchange students usually do not have to pay attention to module structures. But sometimes, there are practical classes that must go together with lectures. Please check with your study advisor.

International students studying an entire program at Justus Liebig University must pay attention to module structures in order to successfully complete their studies.

CURRICULUM

- For each class, there is a pre-defined workload. The workload for a class is the sum of the hours of work spent for the respective class. It includes class participation and preparations for classes and examinations.
- 30 hours of work = 1 CP / ECTS point
- Credit points thus measure the *quantitative* workload students must spend for their classes.
- Additionally, for a successfully completed class, you will be awarded grades
- Grades measure the *qualitative* success of a class.
